Ninh Kieu - Can Tho

About Me

I am a fourth-year student at FPT University, currently majoring in Software Engineering. I possess the capability to work in both backend and frontend development, specifically in .NET and ReactJS. I have a strong commitment to continuous learning, stable teamwork skills, and an affinity for a positive working environment. I evaluate myself as someone who can independently learn and flexibly solve problems. The ability to multitask between backend and frontend not only expands my skills but also deepens my understanding of the comprehensive development process, from server-side to user interface.

Work Experience

Intern

UTA Solution
